

Steps to reboot internet system

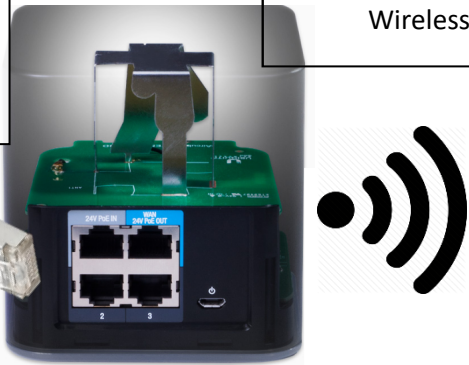

Step 1: UNPLUG POWER CORD FROM WALL THAT IS CONNECTED TO POWER SUPPLY. KEEP UNPLUGGED FOR 1 MINUTE.

Ethernet cable from Antenna on outside of building or residence. Plugs into POE connection on Power Supply.

Ethernet cable from LAN connection on Power Supply to Internet/WAN connection on router.

Wireless Router (Your model may vary).

Please **DO NOT** press reset button on router without first consulting an AIR Technician.

Step 3: PLUG BOTH POWER CORDS BACK IN AND WAIT ABOUT 4 MINUTES FOR BOTH TO CONNECT AGAIN.

Step 2: UNPLUG POWER CORD FROM WALL THAT IS CONNECTED TO YOUR WIRELESS ROUTER. KEEP UNPLUGGED FOR 1 MINUTE.
